

UMANG SINGH

Product Manager · AI Product · Technical PM · 0 → 1 Builder
+91 9548346394 | umang.uiux@gmail.com | [LinkedIn](#) | Gurugram, India

PROFILE SUMMARY

PM who has owned a product end-to-end — roadmap, PRDs, user research, sprint delivery, and post-launch iteration. At Rylor I was the only PM: built the company's first platform from scratch, talked to users directly, translated feedback into backlog, and used funnel data to prioritise what to fix. I also bring genuine AI depth — designed LLM workflows at Thrifty AI, built two live AI products solo, and understand the gap between a model that works in demo and one that works in production.

CORE SKILLS

AI / LLM	LLM Product Design · Prompt Architecture · Agentic Workflow Design · Guardrail Design · Output Validation · Eval Frameworks · RAG · Human-in-the-Loop Design · Model Selection
Product	PRD Writing · User Stories · Backlog Management · Feature Prioritization · User Research · GTM Strategy · Sprint Planning · Roadmapping · Stakeholder Management · Agile
Analytics	Funnel Analysis · Cohort Analysis · SQL · GA4 · Mixpanel · Amplitude · A/B Testing · KPI Definition · Retention Analysis · User Behaviour · Power BI
Technical	React · REST APIs · Zod / JSON Schema · SSE Streaming · Data Pipelines · Git · System Design · Lovable · Cursor · Claude · Replit · Low-Code Build · Figma

WORK EXPERIENCE

Rylor Group | Remote — Sheridan, WY | Aug 2025 – Aug 2026
Product Manager

- Built the company's first digital platform from scratch — took it from blank page to live, defined the roadmap, wrote the PRDs, ran sprints, and managed delivery across engineering, design, and business.
- Talked to users directly, found recurring pain points, and turned them into backlog items. Built the lead generation framework and owned other product work across the engagement.

Iced Automations LLC | Remote — Sheridan, WY | Jun 2025 – Oct 2025
UI/UX Designer & Product Builder

- Designed and vibe-coded **100+ websites and first digital homes** for international clients — ran competitor analysis, gathered requirements, designed in Figma, and built each site using Lovable, Cursor, and Replit.
- Spotted an internal workflow problem, built a tracking tool to fix it using low-code tools, and shipped it — the whole team uses it now.

Thrifty AI | Remote, Ahmedabad | Oct 2024 – Mar 2025
UI/UX Design Intern — AI & Agentic Systems

- Designed operator-facing AI workflows and human-in-the-loop review logic for LLM pipelines across 8 enterprise clients. AI output quality improved by **22%** through structured prompt design, schema-enforced output validation, and functional specs written directly from client requirements.

PERSONAL PROJECTS

Letsrole.in React · TanStack · Lovable · Cursor · Claude · AI APIs · Zod Schema · SSE · Figma · GA4
AI Career Platform · Solo PM & Builder · 2-Week Sprint · Live

- Ran user research, found the problem, and built the product solo in 2 weeks — prompt architecture for 6 AI surfaces, server-side Zod validation to catch bad outputs before users see them, SSE streaming to cut latency, and iterated on GA4 funnel data after launch. A prototype, not a production system.

Seekai.in React · Lovable · Cursor · Claude · Gemini · GPT · AIS Data · LLM-Judge Eval
Geopolitical Intelligence Platform · Solo PM & Builder · 14-Week Sprint · Live

- Talked to analysts who were using 5 separate tools to answer one question, defined the product, and built a platform with multi-model AI orchestration, a heuristic + LLM-judge ensemble for signal validation, and a 240-event eval framework across a 38-partner pilot. A prototype, not a production system.

Uber Marketplace — Reliability & Trust Product Case Study · Aug 2026 · Self-Initiated
Driver Compliance · Rides Dispatch · Eats · FinTech

- Mapped 11 pain points across Uber's marketplace into a P0/P1/P2 framework. P0: removed bot deflection on life-critical queries and designed a tenure-weighted driver deactivation model with a 72-hour grace period. P1: Redis-backed idempotency keys for phantom billing, expanded Reserve dispatch to T-30. P2: one-tap micro-debt waivers and daylight-adaptive time-pickers.

EDUCATION & CERTIFICATIONS

B.Tech. in Computer Science & Information Technology 2024 | KIET Group of Institutions, Delhi-NCR
Project Manager Essentials — Professional Certification Aug 2026 | iskima · Score: 96%
Professional Certification — Business Analysis & Process Management Oct 2024 | Coursera
